System Information

Set Up Digital Audio

Restore Defaults

This page allows you to select displays for audio playback. Use the Windows Sound settings to configure the system's audio output. For best results, play audio content while configuring these settings.

1. Verify displays that will appear as audio devices in the Windows Sound settings:

GeForce 9500 GT	
DVI (1):	Sony TV XV
DVI (2):	No audio capable display available

2. Configure playback devices with the Windows Sound settings.

Open Windows Sound settings...

i You may need to restart audio programs after changing the settings.

Description:

A list of graphics card connectors capable of audio output.

Typical usage scenarios:

- Selecting which display will appear in the Windows Sound panel as an audio device
- Disabling audio on connectors
